Temporary Solutions for Long-Term Success

When it comes to providing truly multi-dimensional solutions to the temporary power and temperature control needs of your business, most companies in the industry try and solve the problem by throwing products at the problem. But products are just a piece of the solution. You need a partner who gets that. At Kohler, we’ve worked with industry leaders and have decades of experience, vertical, and cross-industry expertise. And after each project, we record all learnings, lessons, and insights to deliver on an enterprise-wide scale.

Instead, our nimble, hands-on approach translates into smart, customized solutions.

Experts at Every Step

Kohler Rental’s Technical Services and Design Team will work with your team to determine the best solution. They’ll help you specify, design, install, and execute your projects seamlessly. Far more than a simple supplier of equipment, we’re focused on helping you determine the best and most cost-effective ways to improve process efficiency, handle capacity constraints, expand, or prepare for maintenance and emergency situations.

Product of a Whole Different Order

- All generators manufactured by Kohler, the world’s third largest industrial generator manufacturer
- Power modules, Kohler-engineered generators and integral switchgear
- Full line of temperature-control equipment including chillers, air conditioners and heating equipment

Kohl-Co.

Advancing Living Environments Worldwide. Kohler Rental has been a leader in the industry for over 40 years. Since 1973, Kohler Co. has been pioneering the exploration of the customer’s needs. As a result, Kohler Rental has developed a reputation for a variety of applications, including process cooling, temperature control, and energy efficiency.

Kohler Rental didn’t become a leader in the industry by accident. Since 1873, Kohler Co. has been improving the lives of its customers with exceptional products and services. Our powerful portfolio of brands leads the way in design, craftsmanship, and innovation – knit together by a single level of uncompromising quality.

Offering the finest plumbing fixtures, furniture, tile and stone, and primary and backup power systems that meet a wide variety of needs, our entire product offering is designed to capture the essence of charm, good taste and generosity of spirit. Right now, Kohler ideas and craftsmanship are advancing living environments worldwide and making people’s lives better.

Call Kohler Rental today to learn how we can protect your company from the unexpected. KohlerRental.com 888-769-3794

Temporary Solutions for Long-Term Success

When it comes to providing truly multi-dimensional solutions to the temporary power and temperature-control needs of your business, most companies in the industry try to solve the problem by throwing products at the problem. But products are just a part of the solution. You need a provider who gets that. And while we’ve worked with industry leaders and have decades of experience, we also like to offer a fresh perspective on the solutions you need. And after you’ve been around for more than a century, we know the value of not offering one-size-fits-all solutions, whether in terms of equipment, service or overall consideration.

Instead, our nimble, hands-on approach translates into smart, customized solutions.

Experts at Every Step

Chemical, Petrochemical & Refining

When ConocoPhillips installed their new water pumps at their facility, local utility power was not available. So who did the third party call to install temporary generators? Kohler Rental. Faced with challenges like this every day, we offer turnkey solutions that improve process efficiency without requiring investment of capital.

Our capabilities in the petrochemical and refining industry include:
- Providing temporary cooling capacity for temperature-sensitive products, such as alkylate, polyethylene, catalytic cracking, reactor cooling and supplementary turbine cooling.
- Ensuring power reliability on remote locations.
- Drying/desiccation problems where excess heat and humidity cause product loss.
- Providing power and temperature control solutions for plant startup and maintenance.
- Increasing capacity where temporarily needed.
- Power solutions for both back-up and main power generation projects.
- Interconnecting power for all of our catalytic cracking units.
- Providing temporary cooling of the water and storage tanks.

Other capabilities include:
- Improving process efficiency without investment of capital.
- Improving process loss and inefficiency by providing redundant backup power.
- Increasing capacity where temporarily needed for plant startups and maintenance.
- Our reliable equipment is on hand to handle seasonal temperature/wet/dry control problems.
- Our skilled team of hydro-cooling experts manage any type of system.
- Temperature control solutions for yearly or non-peak applications.
- Drying and dehumidification solutions.

Manufacturing

For large-scale over the counter (OTC) pharmaceutical company, seasonal temperature control is critical to the manufacturing and storage process. With little space to accommodate existing duct work, Kohler Rental designed an innovative approach to cooling. Adding high-capacity portable KOHLER® chillers and reconfiguring existing HVAC towers, Kohler Rental solved this problem.

Our capabilities in the manufacturing industry include:
- Providing temporary cooling capacity for temperature- sensitive products, such as alkylate, polyethylene, catalytic cracking, reactor cooling and supplemental power backup cooling.
- Ensuring power reliability on remote locations.
- Debottlenecking problems where excess heat and humidity cause product loss.
- Providing power and temperature control solutions for plant startup and maintenance.
- Increasing capacity where temporarily needed.
- Power solutions for both back-up and main power generation projects.
- Interconnecting power for all of our catalytic cracking units.
- Providing temporary cooling of the water and storage tanks.

Other capabilities include:

- Our skilled team of hydro-cooling experts manage any type of system.
- Temperature control solutions for yearly or non-peak applications.
- Drying and dehumidification solutions.

Kohler Rental will assist with a range of utilities including water supply and sewage treatment, natural gas distribution, electric power generation, transmission and distribution.

Other capabilities include:
- Increasing regained production.
- Improving business performance during high temperature.
- Providing power solutions for shutdowns and maintenance.
- Providing multi-megawatt solutions to ensure critical equipment has an onsite standby power source for critical equipment.
- Kohler Rental designed to provide detailed logistics planning as well as 6.2 megawatts of reliable electric power.

Regulatory Commission insisted Ameren have an onsite standby power source for critical equipment. Kohler Rental stepped in to provide detailed logistics planning as well as 6.2 megawatts of reliable electric power.
When ConocoPhillips installed four new water pumps at their facility, local utility power was not available. So who did the third party call to install temporary/seasonal power? Kohler Rental. Faced with challenges like this every day, we offer turnkey solutions that improve process efficiency without requiring investment of capital.

For large-scale operations, the DTU pharmaceutical company, seasonal temperature control is critical to the manufacturing and storage process. With little space to accommodate existing duct work, Kohler Rental designed an innovative approach to cooling. Adding high-capacity portable KOHLER® chillers and reconfiguring the building enabled the pharmaceutical company to maintain the proper temperature for its product.

We offer turnkey solutions for any type of manufacturing. Non-pharmaceutical food and beverage, pulp and paper to automotive manufacturing, and everything in between. Other capabilities include:

• Improving process efficiency without investment of capital
• Improving process loss and downtime by providing redundant backup power
• Increasing process heat recovery for maximum efficiency
• Providing and temperature-control solutions for plant startup and maintenance
• Improving overall production rates
• Helping to avoid costly production shutdowns
• Providing process cooling for the pharmaceutical industry
• Increasing process rate for the chemical, petrochemical and refining industry
• Converting cooling into new revenue streams
• Avoiding chiller maintenance hours
• Providing process cooling for marginal equipment

Other capabilities include:

• Increasing process efficiency without investment of capital
• Providing and temperature-control solutions for plant startup and maintenance
• Providing and temperature-control solutions for plant startup and maintenance
• Helping to avoid costly production shutdowns
• Providing process cooling for the pharmaceutical industry
• Increasing process rate for the chemical, petrochemical and refining industry
• Converting cooling into new revenue streams
• Avoiding chiller maintenance hours
• Providing process cooling for marginal equipment

Chemical, Petrochemical & Refining
When ConocoPhillips installed its new water pumps at their facility, local utility power was insufficient and not available every day. So ConocoPhillips turned to Kohler Rental for a turnkey solution that meets their to-day's challenges without requiring investment of capital.

Our capabilities in the petrochemical and refining industry include:
- Providing temporary cooling capacity for temperature-sensitive processes, such as alkylation, catalytic cracking, olefin cracking and supplemental gas turbine cooling
- Ensuring power reliability on remote locations
- Debubbling systems, where elevated pressure and humidity cause product loss
- Providing power and temperature-control solutions for plant start-up and maintenance
- Increasing capacity where it is needed most
- Power solutions for tasks like maintenance and turnaround projects
- Intermittent power and for catalytic cracking units
- Providing temporary cooling in storage tanks

Manufacturing
For industries like this every day, we offer turnkey solutions that improve process efficiency without requiring investment of capital.

Our capabilities include:
- Improving processes for efficient manufacturing and production
- Ensuring power reliability for vital manufacturing processes
- Providing temporary/seasonal power solutions for plant shutdowns and maintenance
- Our capabilities in the petrochemical and refining industry include:
- Generating power for critical equipment, whether it's large-scale injection applications or small, sensitive processes, such as alkylation, gas condensation, catalytic cracking, reactor cooling and supplemental gas turbine cooling
- Ensuring power reliability in remote locations
- Debubbling systems, where elevated pressure and humidity cause product loss
- Providing power and temperature-control solutions for plant start-up and maintenance
- Increasing capacity where it is needed most
- Power solutions for tasks like maintenance and turnaround projects
- Intermittent power and for catalytic cracking units
- Providing temporary cooling in storage tanks

Utilities
When AEP called on Kohler for a turnkey solution for their plant, the largest electric utility in Missouri and the second largest in Florida, we answered to help reduce spoilage and maintenance costs. We offer turnkey solutions for any type of manufacturing, from pharmaceutical to food and beverage, pulp and paper to automotive manufacturing, and everything in between.

Our capabilities include:
- Improving process efficiency without investment of capital
- Ensuring power reliability for vital manufacturing and production
- Providing temporary/seasonal power solutions for plant shutdowns and maintenance
- Our capabilities in the petrochemical and refining industry include:
- Generating power for critical equipment, whether it's large-scale injection applications or small, sensitive processes, such as alkylation, gas condensation, catalytic cracking, reactor cooling and supplemental gas turbine cooling
- Ensuring power reliability in remote locations
- Debubbling systems, where elevated pressure and humidity cause product loss
- Providing power and temperature-control solutions for plant start-up and maintenance
- Increasing capacity where it is needed most
- Power solutions for tasks like maintenance and turnaround projects
- Intermittent power and for catalytic cracking units
- Providing temporary cooling in storage tanks

Kohler Rental will assist with a range of utilities including water supply and sewage treatment, natural gas distribution, electric power generation, transmission and distribution.

Other capabilities include:
- Increasing regional production
- Improving bullet performance during high temperature
- Providing power solutions for utilities
- Providing cooling solutions for injection
- Offsetting diesel emissions, air and transformer
- Providing cooling solutions for injection
- Motor starting and process cooling
- Temporary cooling during maintenance, repair or replacement
- Providing cooling applications for injection
- Performing cooling for air and water applications
- Drying and dehumidification solutions

When ConocoPhillips installed its new water pumps at their facility, local utility power was insufficient and not available every day. So ConocoPhillips turned to Kohler Rental for a turnkey solution that meets their to-day's challenges without requiring investment of capital.
Temporary Solutions for Long-Term Success

When it comes to providing truly multi-dimensional solutions to the temporary power and temperature-control needs of your business, most companies in the industry try and solve the problem by throwing products at the problem. But products are just a piece of the solution. You need a provider who gets that. And while we’ve worked with industry leaders and have decades of experience, we don’t follow a one-size-fits-all mentality when it comes to solutions. Instead, our nimble, hands-on approach translates into smart, customized solutions.

Experts at Every Step

Kohler Rental’s Technical Services and Design Team will work with your team to determine the best solution. They’ll help specify, design, install and execute your projects seamlessly.
