NOTE:
The recommended distance from a structure is dependent on State and local codes, and demonstration in accordance with NFPA 37 Section 8.1.6.2 by a third party test facility to the dimensions shown.

For installations near non-combustible or 1-hour fire rated structure, a minimum distance of 10' is required to ensure proper generator cooling.

AESTHETIC

1. Exhaust is given easy or parallel to structure.
2. Exhaust is not directed at patio, deck, or other areas where people congregate.
3. There is a window, vent, door, or similar structure opening at least 2 feet from the exhaust end of the set.
4. Set is not close to structure.
5. Wind and doors on adjacent walls are closed.
6. Windows and other similar intakes are at least 10 feet from exhaust end of set.
7. A 3-inch thick gravel, base, or concrete pad is used to prevent grass and weeds from growing too close to the set.
8. No plants, shrubs, or other combustibles allowed in clearance area (minimum 6 ft. from exhaust end).
9. Refer to owner's manual for other installation constraints.
10. No plants, shrubs, or other combustibles allowed within 30' of air intake.
